CAUGHT ON THE FLY.

Monday is court day in Lancaster and Essex counties.

Misses Sadie Gourley and Maggie Gibson, of Baltimore, made the trip to Norfolk and Fredericksburg with Capt. Mason Gourley last week.

WESTMORELAND DOTS.

Many people are sick. Among those seriously so is Miss Lettie, the daughter of Mr. and Mrs. Elliot. Her life has been despaired of. She is under the care of Dr. Fairfax and Chas. R. The disease is typhoid-pneumonia.

Mr. and Mrs. Lloyd Sneed, of Heathsville, recently paid Mrs. H. R. Moss a visit. Lloyd was driving a spanking team.

J. C. Thrift celebrated his 82nd birthday recently. In his young days he was of "rough, roll and tumble" habits, and many were the Northumberland and Richmond county bullies he could mop the earth with.

Jones Atwell and Mr. Blackwell were on a visit to Wm. Hutt's a few days ago.

Manuel Dos Passos has been a frequent visitor at the office recently. During this fine weather can be seen passing many young lady riders, among them being Miss Nannie Penington on her spirited little black "Gipsy" and Miss Lura Garner on "Sprightly". There are many others to be seen passing and repassing, all superb horsewomen.

Miss Elbert Vansant, Mrs. Cammie Courtney and Mrs. Geo. Vansant spent some time visiting Mrs. H. R. Moss.

There was an opportunity for some fun by the young folks to have a ride. Mrs. Moss, Mrs. Nina Unruh and Misses Julia and Homelene Moss and Master Charles Francis were among the party.

The Weems Line will double up their boats early in March.

Oysters have jumped up again. They brought 70 cents at Cole's Point on the 7th inst., and the stock was only ordinary.

Mrs. S. T. D. Cox is quite indisposed at this writing.

Mrs. W. R. Branson, of Cole's, has been spending several days at Mrs. Thrift's, Kinsale.

A new portico has been erected over the ladies' entrance of the Hotel Hardwick on Steamboat street, Kinsale.

S. B. Hardwick was after the birds a few days ago. He proved himself to be a crack shot, and returned with a good bag of most of them being single shots. Plug Hardwick has also been making the fur and feathers fly.

Will Tayloe and Master Walter Randolph Griffith were here some time ago to have the motive power of a fine Columbia gramophone repaired. Mr. Tayloe placed some records on the machine and entertained us with fine music. The performance was a revelation to us, as we could distinguish the words of songs at the distance of fifty feet, which is pretty good, considering we are totally deaf in one ear and nearly so in the other. We mention this because it proves to us that all advertisers are not liars.

It is a hard matter to be different from the other writers and abstain from saying something about the roads. Now the roads are all right. It is the people that are wrong. They will persist in placing a greater burden on the roads than they can perform, and abuse the road-menders when they have only themselves to blame.

If keeping a road level and well drained were all that is needed in order to have a good road at all times, would thousands of dollars be spent to make pikes and macadam roads? No; the macadam constitutes a floor to circumvent Jack Frost, consequently this character of roads is good at all times and under all conditions of weather. Now it is impracticable to macadamize all country roads. So do the next best thing—keep them as well drained as possible and stop heavy traffic until the road becomes settled after winter has loosened its grip. WILLWATER.

Mrs. Maria Stephens is also on the sick list, but we are glad to report her somewhat improved.

A telegram was received recently stating that H. T. Smith, of Washington, was quite sick. The writer, with his many friends here wish him a speedy recovery.

S. H. Stranghan had the misfortune to lose a valuable horse the past week. The animal with another horse was attached to a wagon hauling cord wood to Kinsale, where the accident occurred. It is supposed to have been caused by over-straining.

There came near being a big fire near Oldhams last week. Charley Balderson had some provender and two shoats that were enclosed in a pen burned. It is reported to have been caused by a colored boy setting a broom-sedge on fire.

We welcome Mr. and Mrs. Howard Crabbe in our midst.

Dr. F. W. Lewis has returned from his hunting trip. The weather was unfavorable, ducks did not fly the doctor's way and sport was poor.

Mrs. Glown, who has been on the sick list for some time under the care of Dr. Lewis, is convalescing.

Richmond and Lancaster counties may be brought into closer relation in the near future by a handsome bridge spanning Morattic creek; at least such is the hope of the projectors.

There is a probability of a pickle factory being erected at this place in the near future. We trust our farmer friends may take hold of their end of the enterprise, as we have it from good authority that the gentleman who contemplates erecting the factory says the soil around here is equal to any he ever saw for raising cucumbers.

The little children of W. H. Warren, who have been quite sick during the last few weeks with whooping cough, are much better at this writing. We hope their merry voices no longer.

Mrs. W. J. Newbill and W. McD. Lee and little Miss Fannie and Annie Lee, of Irvington, spent Friday last week at the home of R. B. Boughton in this village.

NUTTSVILLE.

The Epworth League entertainment at Mottus on the 4th instant was a decided success, the receipts being \$95.50.

The noble band of workers at Bethel church are now rewarded by worshiping in their church free of all indebtedness.

Miss Ella Coffey, missionary and teacher of the Virginia School in China, now on leave in this country, has written the District Secretary, accepting an invitation to attend the district meeting at White Stone. Miss Coffey will add unusual interest to the meeting, and Reppahannock District is to the meeting.

A Weak Stomach causes a weak body and invites disease. Kodol Dyspepsia Cure cures and strengthens the stomach and wards off and overcomes disease. J. B. Taylor, prominent merchant of Christmas, Texas, says: "I could not eat because of a weak stomach. I lost all strength and was unable to do any work. All that money could do was done, but all hope of recovery vanished. Hearing of some wonderful cures effected by the use of Kodol I concluded to try it. The first bottle benefited me, and after taking four bottles I am fully restored to my usual strength, weight and health."

No Pretext About the Stogies.

"What do you smoke stogies for?" asked Rivers.

"Because," replied Brooks, lighting another one, "a stogie doesn't pretend to be anything but what it really is. It isn't a twofor (puff, puff), masquerading as a five-cent cigar that's just as good as a ten-center."—Chicago Tribune.

REV. CRAWFORD DISPLACED.

New Head Chosen for the Virginia Anti-Saloon League.

Rev. C. H. Crawford, for a year or two State superintendent of the Anti-Saloon League, was displaced by the State executive committee and Rev. J. Sidney Peters, of Hampton, elected in his stead. Rev. Mr. Crawford was tendered the less important position of office superintendent, but he declined this, and in the Christian Federation criticizes the committee rather sharply.

The committee expresses high appreciation of his work, but feels that better results can be obtained by having a Virginian who knows the people better, and his selection of Rev. Mr. Peters, a Methodist minister, was unanimous.

We bespeak for the Virginia editors the courtesies of the Florida alligators.—Richmond Times-Dispatch.

Tendency of the Times.

The tendency of medical science is toward preventive measures. The best thought of the world is being given to the subject. It is easier and better to prevent than to cure. It is one of the most dangerous diseases that modern men have to contend with, can be prevented by the use of Chamberlain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip), and it has been observed that this remedy counteracts any tendency of these diseases toward pneumonia. This has been fully proven in many thousands of cases in which the remedy was used at the first onset of the great prevalence of colds and grip in recent years. It can be relied upon with absolute confidence.
